## Building Foundations for Healthy Relationships: Violence Prevention Curriculum for Middle School

CARES Northwest offers teacher training in our violence prevention education curriculum for Middle School students, Building Foundations for Healthy Relationships. Our prevention education seeks to stop child abuse and interpersonal violence by promoting healthy relationships, healthy development, and safe environments. Building Foundations for Healthy Relationships satisfies every component of [Erin's Law](#), and meets many of the Oregon Health Teaching Standards and [laws regarding violence prevention](#) and healthy relationships. The curriculum incorporates prevention theory as well as culturally responsive pedagogy. CARES Northwest has partnered with Pacific University to evaluate the curriculum. [Click here to see class outline.](#)
